We have all had a frustratingly bad experience with our computer that has caused us to recoil or cry in frustration. What you might not know is that some of these encounters could've been prevented from getting this far from start, if we had been more careful about what we installed on our computer. In the past, plug-ins and browsers would be downloaded from Microsoft or Google Play without any knowledge if they had been previously used. This has allowed many viruses and spyware programs to get inside the machine and wreak havoc on your hard drive before it even gets started! So, I've rounded up 37 of the most important websites where you can download software for free that will prevent such experiences before they become a problem. I've also highlighted some handy links that will allow you to update your current programs, troubleshoot any problems you might be experiencing, and reset your browser settings to make sure you are always protected against potential threats. 1. Freeware (Tech) Download Sites 2. Tech File Download Sites (Updated Monthly) 3. Tech Update Files (Updated Weekly) Today I want to talk about some of the best free software that Corel has ever released over the years while still providing everything else you need too while at the same time being absolutely safe while running on your computer. The first thing you will need to do is download Corel Drivers for Windows 7. This does not come with the installation. The next two files are responsible for making sure that your Corel programs run at their optimum performance while running on your computer. To download the most recent version of these files, go to www.corel.com/drivers/download/update-sfx-x64.exe and www.corel.com/drivers/download/update-sfx-x86. exe To make your computer run more quickly, download Corel XL SpeedUp for Windows 7.
