Jan 6, 2013 Introduction and operation of the Diagnostics tool (Vinrude Diagnostics) Main page: EVINRUDE E-TEC E40DRLAA SERIES MANUAL ONLINE; Available in most Vinrude Outboard Engine manuals or see the Resource

A: It seems to be a USB/Serial cable. The very first step is to connect your computer to the engine via USB. Start the diagnostic tool (it's called evinrude diagnostics software). In the software you can switch from USB to serial, but not back. If it is already connected to the boat, the best way is to buy a serial/USB cable and then use it with your computer. The speed of the connection should be set to 4800, that means that every character takes 4.8 microseconds to reach the computer (instead of the default of 460us). The use of a serial port is not unusual when talking about a boat. You can set up a serial port between the engine and the computer and use any of the software that provides that possibility. It is common to make a serial port, a display, a button to stop the engine and some sensors to control the car. But I can't tell you if they have something like this on your boat or not. Evinrude diagnostics software The evinrude diagnostics software is provided with the efi or fitch outboard and allows you to monitor and control the performance of your engine from your computer. The software can be downloaded and installed on the computer and is supplied in a Windows.exe file format. A: I would get an older version of evinrude diagnostics software. I've been running the 5.1 evinrude diagnostics software for a year and it is simply one of the best monitoring software I've used. One little caveat, it will only give you the information from the evinrude data logger, not the engine info or the gauges. I have so many of those firsts I can't figure out what you're doing wrong Just give me a second to talk it out As we walk away together Just a second and we'll be all right There was a time I was too young to understand About the way you played around And there was a time I thought I would never love you But when you came along Something happened inside me You took my love and gave it to me You took my heart and gave it to me Is there a reason why I'm so insecure? Are you that perfect lover? Could there be a reason why I'm so insecure? Are you that perfect lover? 2d92ce491b
