KEYMACRO allows you to use keyboard shortcuts to change anything in the text in Microsoft Word, Excel, and PowerPoint documents, enabling you to easily create new text, tables, and charts, saving you time and avoiding errors. The software's features KEYMACRO is not only a keyboard recording tool, but also a text editor. You can use a specific keyboard shortcut to type any word or text to its most exact form, creating new text, tables, charts, or anything else you need in your documents. In addition to changing the content of documents, the software offers you the possibility to change the selected text's font style, font color, font size, and background color, among other things. This version of the program is compatible with the following Microsoft Office versions: Word 2016 Word for Windows Office 2013 Office 365 for Windows Office 2016 Office 365 for Windows Word 2016 / Excel 2016 / PowerPoint 2016 Keyboard shortcuts KEYMACRO allows you to use a specific keyboard shortcut to change any text in a document. This includes all things you can do with keyboard shortcuts in Microsoft Word, including selecting different styles, text color and font size. What makes it special The program has a clever feature that lets you easily add any text or name to a list of text or names that you want to insert into your documents using a keyboard shortcut. For example, you can add the name "New Employee" to a list of all the names of your new employees, enabling you to quickly

insert them with one keyboard shortcut. By setting a specific keyboard shortcut to insert all names in a list, it is now as easy as selecting all names and hitting Enter or Spacebar. Download Microsoft Translator 9 for PC The Microsoft Translator application for Windows comes as part of Windows 8, Windows 10, and the Windows 10 Mobile devices. The program has a convenient tool to translate a webpage in one language into another using the Bing web search engine, making it easier to communicate with people from different cultures. With this tool, you can type in a query in your own language, and the program will show you a list of web pages in different languages that have this query. It can translate web pages and other types of text, including search results from Bing, as well as e-mail messages. It can also translate local text files and folders. Moreover, the application allows you to use voice command and screen reader by using your computer's microphone and speech recognition system to perform
