Q: Go Programming - How to iterate map inside map in Golang How can I iterate map inside map in Golang I have a map with string key and string value. I want to get the keys and values and make new map with just the keys and values I have tried: new_map := map[string]string{} for _, v := range map_contents[k] { new_map[v] = "" } but it does not work. How to get this done? A: I think you are looking for a slice of maps like this: func main() { vars := map[string]string{ "a": "abc", "b": "def", "c": "ghi", "d": "jkl", } for k, v := range vars { fmt.Println(k, v) } } Output (try it on the Go Playground): a abc b def c ghi d jkl Majdabad, Razavi Khorasan Majdabad (, also Romanized as Ma'dābād; also known as Ma'dābād-e Khāvūd) is a village in Pazandeh Rural District, in the Central District of Malayer County, Razavi Khorasan Province, Iran. At the 2006 census, its population was 1,143, in 282 families. References Category:Populated places in Malayer CountyQ: Hiding sidebar menu for mobile device I have a problem with hiding the sidebar menu for mobile devices. It is working fine for desktop but when I'm testing it on my mobile phone the menu is still displayed. The website is here: Could you help me how to hide it for mobile devices? Thanks in advance A: In you browser's inspection panel, you can see what device is your browser running on. That will help you
