WR-63,951-01 EX PARTE ALLEN CARRINGTON, Applicant ON APPLICATION FOR A WRIT OF HABEAS CORPUS CAUSE NO. 3875-A IN THE 63rd DISTRICT COURT FROM GRAYSON COUNTY Per curiam. O R D E R Pursuant to the provisions of Article 11.07 of the Texas Code of Criminal Procedure, the clerk of the trial court transmitted to this Court this application for a writ of habeas corpus. Ex parte Young, 418 S.W.2d 824, 826 (Tex. Crim. App. 1967). Applicant was convicted of possession of a controlled substance and sentenced to five years' imprisonment. Applicant contends that he is being denied credit for time spent released on parole and that the time of his parole has not been credited to his sentence. The parties have agreed that Applicant is entitled to relief. The parties have also agreed that this Court may resolve the issues raised by Applicant on this application, and that the State shall be permitted to supplement the record with the file and recommendation of the district attorney regarding the parole issue. On June 15, 2009, this Court remanded this application to the trial court for further findings of fact and conclusions of law. On July 28, 2009, the trial court recommended that we grant Applicant credit for time spent on parole. We find, therefore, that Applicant is entitled to credit for time served, and Applicant is entitled to release. Applicant is ordered released to the custody of the sheriff of Gray County. Delivered: September 15, 2009 Do not publish Ararat (company) Ararat Group is a privately held Russian technology company. The company develops and manufactures a range of networking and communications equipment for industrial applications. Ararat

Prakash KumarQ: Enable CORS (Cross-Origin Resource Sharing) on the browser in Ionic I am trying to make a connection to a website, but I am getting this error Access to XMLHttpRequest at " from origin " has been blocked by CORS policy: No 'Access-Control-Allow-Origin' header is present on the requested resource. Origin " is therefore not allowed access. If an opaque response serves your needs, set the request's mode to 'no-cors' to fetch the resource with CORS disabled. Can anyone help me? I want to have my app to run on browser as android and IOS. Thanks! A: If you are trying to use an Ionic app for instagram you will need to install cordova-plugin-instagram EDIT If you are using Visual Studio Code for debugging or running the app on your device as opposed to Ionic serve then you need to be more specific in how you installed the plugin. I suggest creating a new project in Visual Studio Code and installing the plugin. The reason is because if you were using the command ionic serve then all you need to do is run the app in the browser (Ionic serve will install the plugin) but if you were using a standard app to build your ionic app then you would need to install the plugin manually. [Proceedings: 2. Results on the electrocardiogram in patients with myocardial infarct and ischemic heart disease]. As part of the previous work, the results are discussed on the electrocardiograms (ECG) of 30 patients with myocardial infarct (MI) (22 cases with well-developed necrosis in the right ventricle) and 60 cases of ischemic heart disease (IHD) (20 stenoses of the coronary arteries, 11 myocardial aneurysms, 19 cases of hypertrophic cardiomyopathy and 10 patients with "post-infarction" apical aneur 2d92ce491b
