Then you will model some of the corridor layouts and walls in Civil 3D. After class we will show you the MMC tools that are available for the Navisworks Manage project. You can copy and paste the designs for your job and we will also explain the Navisworks Manage Architecture Plugin for Revit and Civil 3D. This week we will continue to work on the Blackjack Casinos project and make it a high-quality model. We will also add the slabs and finish the structure. Then we will detail the furniture to model and make it look like a casino. You will design the front of the casino and then finish it in Civil 3D. Week 7 is a continuation of the Blackjack Casinos Project. We will create the environment and render the blackjack tables for the casino. We will also make the exterior finishes look like a real casino. In this part of the class, we will start to add the loading docks and the security guard for the casino. In this week, you will prepare your Revit and Civil 3D models for Navisworks Manage. Next you will model some of the interior walls and countertops. Then you will set up the project to make model consolidation and then model the corridor layouts. Finally, you will use the export plugin in Revit and Civil 3D to generate the export files. This week we will continue the Blackjack Casinos Project. We will create the casino, detail the counters, furniture, and eventually end up with a render. This week we will continue to work on the Blackjack Casinos project and make it a high-quality model. We will also add the slabs and finish the structure. Next, you will model some of the interior walls and countertops. Then you will set up the project to make model consolidation and then model the corridor layouts. Finally, you will use the export plugin in Revit and Civil 3D to generate the export files. In this week, we will continue working on the Blackjack Casinos project. We will model the hallway and detail the restrooms in Civil 3D. Next, we will model the countertops, detail the toilets, and the second floor. Then we will model the staterooms and finish the model. This week we will continue working on the Blackjack Casinos project. In this week, we will create the corridor layouts. We will also create the mechanical and electrical systems to make them a real

October 9, 2020 - Solved: I am trying to export IFC files for surface models and pipe networks. These are always exports without color, and when I open them with . It shows that the imported image has many colors. I changed the file name to be "IFC File" and then used "Export to DGN" to print it out. I then export it to a .dwg file. It gives me the error: "Importing files from . 'ImportFile' is not supported." My model has layer 3 and layer 4. Export to layer 1 and 2 works fine. Export to layer 3 and 4 does not work for imported models. Does anyone know why this is so? It's on Mac. Thank you! fffad4f19a
