The driver does not work with Windows 10 Feb 20, 2016 SOURCE: Installed terratec driver not working with windows 10. Now I have windows 10 and the driver does not work. The only way I can get my microphone working again is to install the driver the hard way and put it in the right place. Please see this link. Apr 21, 2019 SOURCE: PLEASE READ BEFORE INSTALLING THIS TERRATEC MICROPHONE DRIVER... I am posting this because I have been trying for weeks and would be happy for someone else to install this driver correctly. I am going to say this upfront before I describe my exact steps so that there is no confusion: I am using the driver installer from your website (so no terratec dev license), this driver does not work with Windows 10 (as far as I know), and I did a firmware update for the driver to support Windows 10, this did not help. I have no issues with this driver (I am using it right now) but some other people seem to have issues with it. When they uninstall this driver, they may still have the hard-coded path in their registry. Here is what I am going to describe: 1.) Make a back-up copy of your Windows Registry before you install the driver. 2.) Make sure you have a Windows 10 partition and no Windows 7/8 partition. 3.) Download the latest version of this driver from terratec's website. 4.) Open the.exe file and follow the instructions. 5.) When you go to step 8, it will ask you to select the driver you wish to install. Make sure you select "TERRATEC MICROPHONE DRIVERS" 6.) Go to step 9. When you get to Step 10, it will ask you to restart your computer. Choose to restart,
