This new model includes a host of new specifications and improvements including the Dual DIGIC 6 processor, a higher resolution 3-inch LCD and an ISO range of 100-25600. This camera is ideal for those who prefer the Canon EOS range of DSLR cameras to the Nikon cameras. Unfortunately it's not great news for those hoping to buy the T6, as Canon has switched from EF-S lenses to EF lenses for this camera, which may be a problem. But Canon has launched this camera specifically for those moving from the T5/700D to the D500, and these changes may well make it one of the best buying options for those on a budget. The T6 / 750D camera now offers a higher-resolution 3-inch LCD screen than the older model and has a larger grip and more buttons than the T5/700D. The large, touch-enabled and pressure-sensitive screen offers a resolution of 1.04 million dots. As well as new features, the D4500 has a number of innovative capabilities, including a new feature called PictBridge, for simple printing via a connected printer. The camera can capture video in 720p and 1080i, support Canon's Supersonic Wi-Fi connectivity and benefit from a new dual mode autofocus and multi-shot AF tracking. Whilst the D4500 changes little in terms of specification from its predecessor, the T6 / 750D, it has a number of important features over the T5 / 700D model, as well as a host of improvements. Find out what it's like to use the D4500 in the video below: Accessories The T6 / 750D camera is a mid-range model for Canon and features a 20.2 megapixel APS-C sensor. The camera records 3ef4e8ef8d
