zip) Crack Pirate Sam 4: Life Is Rough When You Lose Your Stuff!. 45 Cracked, Win Games, PC Games, Crack, Free, Sam 4: Life Is Rough When You Lose Your Stuff!, Crack Pirates Bay Download! Pirate Sam 4: Life Is Rough When You Lose Your Stuff!. 43 Cracked, Win Games, PC Games, Crack, Free, Pirate Sam 4: Life Is Rough When You Lose Your Stuff! Crack Pirates Bay Download!.. Download game crack only! Full game download for free. Direct download from the publisher, also available at GOG.com Link: <http://ew> (and i do not share this!) *Q: Ansible: looping through multiple files I have a lot of files in a directory. I want to loop through these files and then generate variables, then combine the variables with the file names. Example file in directory: abc.mp4 xyz.mp4 Script to run: cd /directory/with/files files=\$(ls *.mp4 | wc -l) for i in 1..\$files; do path=\$(basename \$(echo "\$i").mp4) dest=\$(path/mp4) echo "destination: \$dest" done This script produces destination: abc.mp4 and destination: xyz.mp4. What I'm trying to achieve is to get destination: abc.mp4 and destination: xyz.mp4 in two variables: dest1=abc.mp4 dest2=xyz.mp4 A: you can try this playbook.yml --- - hosts: localhost tasks: - name: Get files in path file: path=/dir/with/files/ {{item.0}} loop: - abc.mp4 - xyz.mp4 with_items: - {{files}} register: file_list - name: Get filenames shell: cat {{item.0}} | cut -d. -f2 | cut -d- -f1
