CYBERCOM SMS is a powerful tool that can boost your marketing campaigns by helping you easily send messages from you computer to mobile phones. The application facilitates sending batches of messages using templates from files or from Excel spreadsheets. Moreover, you can even configure a website SMS service. Publishers/Vendors - Web Sites CYBERCOM SMS is a powerful tool that can boost your marketing campaigns by helping you easily send messages from you computer to mobile phones. The application facilitates sending batches of messages using templates from files or from Excel spreadsheets. Moreover, you can even configure a website SMS service. CYBERCOM SMS allows you to easily broadcast messages from your computer or from a selected website, in real time. The application caters to a multitude of businesses, including marketing, travel agencies, financial, education, trading, logistics or even e-commerce. You can easily send bulk messages or personalized reminders on the customers' telephones for promotions, confirmations, as well as notifications. CYBERCOM SMS requires that you set a suitable device for sending SMS from your computer, such as a 3G modem, a mobile phone or a GSM modem. Install the drives or additional software required for each device, then configure its parameters from CYBERCOM SMS's interface. The configuration center allows you to select the device you wish to use, from the list of detected ports. The device must be configured in advance, so that you can send SMS unhindered. Optionally, you can configure the Web server for providing SMS, by mentioning the FTP address, username/password, if required, as well as browsing interval and spam protection. Once the device is configured and the connection is established, you can return to the main window, in order to start sending messages. Bulk SMS or Automatic SMS can also be enabled, in order to send messages from your SQL database. The automatic SMS tab can save the SQL statement, for continuous execution, at specified intervals. You can start the desktop SMS or WebSite SMS services, as well as send messages using templates. The message template can be extracted from a file, from an Excel spreadsheet or manually type it in. The notification area indicates the current status of the program. CYBERCOM SMS Description: CYBERCOM SMS is a powerful tool that can boost your marketing campaigns by helping you easily send messages from you computer to mobile phones. The application facilitates sending batches of messages using templates from files or from
