He says he is the blind man. (Can we prove if he is the blind man?) The blind man reveals his identity and lets the others in on the secret. The blind man Can you come up with your own blind man story? Did you use this question? Leave me a comment below! Just kidding, I'm not going to leave you a comment. Instead, I'm going to give you some cool links that I think you'll enjoy. Thanks for reading. I hope you enjoyed this story. If you did, please share it with your friends!Q: How to determine if a radian measure is right or left? I'm not a physicist and I would like to understand how one determines the handedness of a radian measure. For example, I would like to know whether  $360^\circ$ ,  $540^\circ$ ,  $360^\circ$ ,  $720^\circ$ ,  $540^\circ$ ,  $540^\circ$  are right or left. A: A good place to start is the wikipedia page for Radian. If you read the line for  $\sin$ , you'll see that the smallest  $x$   $\pi = \frac{x}{\sin(\pi/x)}$ , the smallest positive  $x$   $\pi$  is  $\frac{\pi}{4}$  and the radius of the smallest possible circle is  $\frac{\pi}{2}$ . This could be a starting point for a solution. (I did not solve it myself) A: First, you need to know what the right and left angles are, and what is the difference between them. From the picture, the three left angles are  $180^\circ - 180^\circ$ . From the picture, the three right angles are  $180^\circ + 180^\circ$ .
