) manners . If you see a post which might be a violation of the . . . The closest shop in Walsall is Farmers Coop on . . of these statements, can be true at the same time. For instance: "I like chocolate", "I love chocolate", "I'm not fond of chocolate", "I love chocolate, but I don't need chocolate" etc. What is a parallel statement? A parallel statement is one that makes a similar statement or thought. For instance, "I'm fond of chocolate, but I don't need chocolate". What are the 2 things that make parallel statements true? (three statements made two true) Parallel statements are true because both statements (in this case, "I'm fond of chocolate, but I don't need chocolate") and the negation of each statement ("I'm not fond of chocolate") are true. What happens if both a statement and the negation of that statement are true? They make a parallel statement that is true. "I'm fond of chocolate, but I don't need chocolate" What does it mean to negate a statement? To negate a statement, you make a statement that is different from the original statement. This has the effect of taking away the idea behind the statement and implying it does not exist. For instance, "I like chocolate, but I don't need chocolate" means I like chocolate. I don't need chocolate means I don't like chocolate. Could this sentence have two different meanings? Yes. Consider these two statements: "I'm fond of chocolate, but I don't need chocolate" and: "I don't like chocolate, but I do need chocolate" Each statement could be true depending on what is really meant. For instance, a true statement could mean "I don't need chocolate, but I like chocolate". The missing verb in a sentence can cause two different meanings. For instance, "I'm fond of chocolate, but I don't need chocolate" could have two different meanings. What is the first possible meaning? A statement can have more than one possible meaning. For instance, the meaning of "I don't need chocolate, but I like chocolate" could be both: "I like chocolate, but I don't need chocolate 82138339de
