Visual Studio Integration With the release of AutoCAD 2009, Microsoft Visual Studio Integration became a feature of the product which allows AutoCAD files to be edited in Visual Studio. In addition, it allows AutoCAD files to be opened and manipulated in Visual Studio 2005 and 2008. All native tools and components of Visual Studio such as a property browser, "Add to", "Insert", "Remove", "Edit and Continue" and "Project and Items" can be used in AutoCAD. AutoCAD users can also add or modify objects in Visual Studio. AutoCAD's file format, the DXF format, is an industry standard and can be read by other applications. Mac OS X Integration AutoCAD supports a number of ways to integrate AutoCAD with Apple Inc.'s OS X; Mac users can open and save files in AutoCAD format. The Mac version of AutoCAD natively supports Mac OS X 10.6 Snow Leopard. However, this version does not support using an AutoCAD Add-On, because it is not compatible with the Mac OS 10.6 and beyond. AutoCAD for Mac 2011 provides a way to import and edit DWG and DXF files in the native Mac OS X 10.6 Snow Leopard. When AutoCAD for Mac 2011 is installed, it will provide an "Open with AutoCAD" option on the application's toolbar. History Autodesk released AutoCAD LT for the Apple Macintosh in 1995 as the first CAD (Computer Aided Design) program for the Mac. The first native Mac CAD product was released in 1996 and became AutoCAD. In 2002, Autodesk acquired an equity position in Corel Corporation. In 2003, Autodesk acquired Ideas from Corel and the company became a wholly owned subsidiary of Autodesk. In 2003, Autodesk released AutoCAD 2004 for Mac OS X, adding significant features to the AutoCAD 2004 for Windows including the ability to edit DWG files natively on the Mac. In 2005, Autodesk acquired ManageEngine and became the sponsor of the ManageEngine CAD Solutions for the Mac platform. In 2006, Autodesk acquired Macromedia and released a version of Flash for AutoCAD. This later evolved into native support for AutoCAD, beginning with version 2009.
