Schedule your computer's power options to occur after a preferred time period Easy Power Button 8 allows you to shutdown, restart, sleep, hibernate, switch user, log off or lock your computer after a user-definable period. However, you will primarily need to choose the time duration after which you want the task to be performed, by selecting one of the available options in the 'Timer' scroll panel. It can range from as little as five minutes, to thirty minutes, one hour or three hours. Nonetheless, you also have the option of setting a 'Custom Time', inputting the preferred number of 'Days', 'Hours', 'Minutes' and 'Seconds'. For instance, if you want to schedule a reboot in 2 days and 10 hours, you will need to enter the number 2 in the first box, 10 in the second, while other fields need to be set at 0, as Easy Power Button 8 does not function with blank boxes. Finally, you can click on the targeted power option and the timer will be set, executing the task when the countdown expires. A simple PC shutdown scheduler In summary, Easy Power Button 8 is a useful and simple to understand application that provides you with the ability to automatically reboot or log off your computer after a certain time period, with just a few mouse clicks. . Recent Post Due to the variety of possibilities, the task of selecting a domain name for a company could be an intimidating and puzzling. While some domain registrars offer free or low-cost domain names, you should always be sure that the name you choose for your business matches with the design and purpose you have in mind. the tube and then set it back up.
