Notpod Crack+ X64

Notpod enables you to synchronize MP3 player devices with your iPod/iPhone/iPad music collection, automatically adding or removing tracks from the player. Notpod is a light-weight, open source software that runs in your system tray and automatically detects MP3 players and other devices that are connected to your computer. When a device it recognizes is connected to the system, it will create a playlist for the device in iTunes and it will synchronize that list with tracks on your device. You may then modify this list, add and remove tracks, before you tell the Notpod to synchronize the list with your player. Notpod can: - Detect MP3 players (and other media devices), including iPods and other iOS devices. - Synchronize music on connected devices, including iPods and other iOS devices. - Create new playlists or modify existing playlists, before you tell the Notpod to synchronize the list with your player. - Connect to online databases for continuous album or track updates. - See what music is already on your player. - Limit the number of devices connected at one time. - Customize the display of connected devices. - Add, update, delete and browse music files on connected devices. - Search your iTunes music library. - Copy music to the device. - Sleep or hibernate the device. - Send files to the device. - More features are on the way! Notpod is FREE software. However, you may purchase the optional Notpod Service to: - Send music to connected devices - Censor content - Play music - Sleep or hibernate the device - Change the color of the Notpod - Add stickers to Notpod - Use the Notpod as an alarm clock - Change the language of the Notpod - Disable the Notpod - Keep Notpod up to date - Use your own art in Notpod - Create your own user themes - Use Notpod in other software - Add your own features And more... Please visit the Notpod website for more information. Notpod is Open Source Notpod is FREE software. However, you may purchase the optional Notpod Service to: - Send music to connected devices - Censor content - Play music - Sleep or hibernate the device - Change the color of the Notpod - Add
