Q: How to recover a varchar(max) field that was deleted by the user in SQL Server I have a varchar(max) field that has been deleted by the user. I have tried some of the solutions on Stack Overflow but not found anything that work. Tried: Turn off all constraints. Select * into temp from [dbo].[myTable] RESTORE DATABASE [dbo] FROM

DISK='C:\temp\dbo_uniquethisIsRelictinFile.bak' Created the file and set the file permission as follows. A: It's the first two that you need to do. Turn off all constraints (if any) Select * into temp from [dbo].[myTable] CREATE TABLE #MyTable (-- columns) INSERT INTO #MyTable (col1, col2) SELECT col1, col2 FROM TableName DROP TABLE #MyTable Then you can restore the database from backup as normal. A: If it was dropped with Drop Table MyTable then your options are limited to: restore the backup file to your database or rebuild from a copy of a backup of the database rebuild the table itself from scratch. Assuming the table is still in the database you can do this with the create table as below: CREATE TABLE #t (-- Table attributes/Columns you want to include) SELECT * INTO #t FROM TableName
