A simple tool to create a Windows keymacro which uses the CTRL+ALT+Delete key combination for shortcut delete option in windows task manager. KEYMACRO allows you to create one or more keymacro hotkeys for your applications to quickly & easily remove unwanted processes from Windows Task Manager. KEYMACRO creates a macro with the HotKey type, which takes the HotKey value you specify and concatenates it with the CTRL+ALT+Delete key combination as a shortcut. When you press this shortcut key, the Microsoft task manager will open. KEYMACRO will automatically set the value of the Shortcut Key field of the new process to be the CTRL+ALT+Delete key combination. To reset the Shortcut Key field of a process, simply press the CTRL+ALT+Delete key combination and then click OK. To export a keymacro, click the Export keymacro button and select a location to save the keymacro as a.txt file.

KEYMACRO Features: - Backup and restore functions: With a few clicks, you can create and restore keymacros. - Support many hotkey combinations, such as Ctrl+Shift+Delete and Ctrl+Shift+Home, etc. - Autosaves keymacros, so that you don't need to worry about losing a keymacro when the program closes. - Ability to update a hotkey keymacro in the future - Ability to right click on the task manager and select "Refresh" to see the last updated hotkey keymacro. - Works with all of Windows 7 and XP, including Windows 7 and Vista R2 and XP. - Supports all of the task manager buttons: See what processes are running and active. - The hotkey keymacro is automatically saved. - Uninstall the hotkey from the task manager. - Make a hotkey combination with any hotkey combination, including Ctrl+Alt+Del - Supports all of the hotkey keymacro creation properties: Name, Shortcut Key, Description, Help Key, Font, TTF, Hotkey, Position, and Size. - Execute in a new window, with transparency and high contrast color. - Export the Hotkey keymacro to text files. - Import Hotkey keymacro from text files. - Import hotkey keymacro with the current window - Support the ability to change the hotkey keymacro, then export and
