### What's New in the RSecure PC Lock?

Google Chrome browser is now available for Android and iOS devices. Google unveiled Chrome for Android and Chrome for iOS. The first version of Chrome for Android and iOS was released earlier this year. Both the Google Chrome browser are Android's first official web browsers. Android browsers are not good and easy to use. These two Google Chrome versions are powered by the same technology and technology stack as Chrome on other platforms, which means that the performance is the same and not very fast, and the support for web extensions is the same on both mobile devices. Chrome for Android supports most of Google's most-used web extensions. Google said that in the future it will be releasing Chrome for iPhone, iPad, Mac and Windows. You can download Chrome for Android and Chrome for iOS from the Google Play store and App Store. So, these two browsers support most of the extensions. However, it is not fast, and not very optimized for mobile devices. These two Google Chrome versions are also not very easy to use. So, we have taken it's features in detail to know about Chrome for Android and Chrome for iOS. Please Share this Article With Your Friends & Followers: Google's New Chromecast Streaming Streaming Device Arrives Chromecast streaming streaming device comes with Google Play movie, music, and TV apps, some devices in a casting with the show running on your phone or tablet. And just like the Chromecast dongle or Google Home Mini, Chromecast streaming streaming device is a small, inexpensive HDMI dongle that plugs into your TV and receives and play media from your Android phone, tablet, or laptop. You can easily cast streaming media to your TV or Chromecast device without the use of wireless router. Google Play Movies and TV is one of Google's apps which supports Chromecast streaming streaming device. You can cast your Google Play movies, TV shows, or music to your Chromecast streaming streaming device without the need of a home router. Google has already announced about the Chromecast dongle at its I/O Conference in May. Google also announced that it will be coming to Europe on July 20. Chromecast streaming streaming device will be available in the US on July 29. Google introduced the new Chromecast streaming streaming device, Google Chromecast, at its Google I/O Conference in May. Although, at the time of introducing the device, Google did not provide much information about the device, it did confirm that it would be coming to Europe. But in the meantime, Chromecast has been spotted in the hands of several users in Europe. At the start of July, Google will be rolling out the new Chromecast streaming streaming device to the United States. But Google did not announce the date of the US launch and that it will be launched in July. However, Google did mention about the launch in June and that it was available in the European countries.
