Plenty of choices to be made The best thing about this application is the variety it comes packed with. Not only are there plenty of indie games from which to choose, but the price range sits between totally free and a couple of dollars, all this for hours on end of fun. The reward system is a plus, especially since the prizes themselves are more indie games. Not all games might be as interesting or as well-designed, but the majority are sure to catch your eye. Chat with your buddies When gaming, no matter what type of games you're dealing with, there's quite often the need to talk to others as well. Whether you want to ask an opinion or are looking for more information regarding a certain title, the reality of it all is that it's uncomfortable to keep chat clients open beside your gaming platform. With this in mind, Kartridge manages to add a chat room where users can talk to each other without having to open other apps. Kartridge is a happy and intriguing application. You don't have to be an indie game enthusiast. All you have to do is try it for a little time, and you'll most likely get hooked on it without even realizing it. All that is left for you to do is decide on what games to try first and which titles to leave for later assessment. No matter, there will always be a game to try
