Word Processing Made Easy: The Cut-and-Paste Tool When you manipulate an image in Photoshop, you use various tools to add, remove, resize, and erase. Also, when you cut or copy an image from one area of the layer window to another, you use the "Cut" or "Copy" tool. And if you want to paste an image from elsewhere to another area, you use the "Paste" tool. Whenever you cut or copy an image, you're also cutting or copying the layer in which the image appears. So after you copy or cut an image, you may have a layer of your own with a new name. In addition, when you paste an image, you're also pasting an image into another layer. So wherever you paste the image, you have a layer of your own with a new name. Let's say that you've got an image you want to paste onto a color or black-and-white layer. You use the "Paste" tool, and a new layer appears beneath the layer of the original. The new layer is visible because it has a white background color. The new layer is created at the same time that the image is pasted onto the new layer. When you paste an image, a layer of your own appears beneath the image that you've just pasted. If you go to Edit⇒Paste, or click the Paste button on the Image toolbar, Photoshop pastes the image on the layer with the same name. Then the layer gets a new name, changing the name of both the image and the pasted image. You can also use the Paste button on the Image toolbar to paste the current layer's contents on the new layer. After you paste the image, the layer changes its name. The same thing happens if you use the Cut or Copy tool to paste an image to a new layer — a new layer appears on the new layer. If you want to paste an image to an existing layer, you have two options: You can choose Edit⇒Paste, or you can go to Layer⇒Paste to Paste the image to the layer. As we describe earlier in this chapter, when you open or create a new file, a library of predefined images is created for you at the bottom of the screen. (Your library is in your Personal Folders directory.) When you start a new project, you can choose an image
