Keyboard macro is a powerful application designed to help you work faster on your keyboard. The program comes with a rich set of built-in presets, which you can use to easily control a variety of common keyboard actions. You can also customize these actions and create your own presets. To start using the tool, first you need to configure a short sequence of keyboard shortcuts. Then you choose the preset you want to use for a particular operation. Whenever you type the preset shortcut, the program automatically performs the requested operation, with the final result automatically displayed. Features: - Built-in presets for common keyboard actions - Customize your own presets - Works with Windows XP, Vista and Windows 7 - Save and load custom shortcuts - Keyboard shortcuts based on country and language - Support for USB keyboards - Locking How to use: Once installed, start the application and configure the shortcuts you need for the actions you wish to automate. After setting up the shortcuts, you have to choose the preset you want to use for the action you wish to automate. If you need to perform another action at the same time, repeat the steps above and select the preset you need for the new action. Keyboard shortcuts should be very close together, so it's highly recommended to adjust the number of keys to be pressed and the time to be held. You can create your own presets for each country you live in, based on the language you use, and you can save them in the program's configuration file, or use the tool's built-in help to create your own presets. How to get Keymacro: Keyboard macros require some basic computer skills, so you should expect some technical problems during the installation process. Should you run into any issues, Keymacro Support is always there to help you solve the problems you might encounter. Additional information: Keymacro does not require a lot of disk space, but it may take a while to complete the installation process, depending on the number of shortcuts you create. Similar software shotlights: If you are looking for a really lightweight utility for creating a bunch of shortcuts for commonly used keyboard actions, you should definitely try the free Keymacro program.
