An easy-to-use system tray alternative to the Recycle Bin Climy is a free tool that allows users to create temporary folders in Windows. It also gives users the capability to create a custom desktop icon and organize folders. This type of tool is very useful if the standard Recycle Bin doesn't provide the functionality that you require. Climy is actually an alternative to Folder Lock, which is a third-party tool that would allow users

to lock any folder they want, temporarily. However, this is done by locking the folder's content (documents, images, etc.) instead of the folder itself. The main features of Climy are: - Create folders in Windows using just one click - Create a custom desktop icon that includes all folders - Organize folders in a tree-like structure - Choose the type of icon to display for the folders - Create a user-defined key combination to access the folder contents - Choose between different folder notifications - Set the temporary folder properties as you wish - Choose between 8, 16, and 32 key combinations - Free, open-source software, available in PortableApps.com XDesk is an intuitive and user-friendly tool that allows users to have all the same functions they are accustomed to having from the Recycle Bin. However, the Recycle Bin is not replaced in favor of XDesk. Instead, it adds a visual mark next to the Recycle Bin's icon, to indicate that it is a temporary folder. XDesk allows users to access

the temporary folder in various ways: it is completely accessible via the right-click menu of Windows. Additionally, users can access it using their keyboard as well, via a pre-defined key combination. XDesk offers the same features as the Recycle Bin (deleting, emptying, etc.), with the main difference being that it does not make the Recycle Bin disappear. Instead, it simply puts a mark next to its icon. While XDesk is a free tool, users can get the full version for a low price. Moreover, it is possible to have a trial version.

CornerBin is a utility that replaces the Recycle Bin icon on the desktop with an intelligent icon that allows to access the Recycle Bin from the system tray area. The Recycle Bin icon is simply replaced by an intelligent icon that provides additional features, like quickly emptying the Recycle Bin or checking the contents of the Recycle Bin. CornerBin works by default with the Recycle Bin setting on (Windows Vista, Windows XP, Windows 7, Windows 8, Windows 8.1, Windows 10). However, it also allows users to configure it to open the Recycle Bin, or alternatively replace the Recycle Bin shortcut on the desktop. When the Recycle Bin is empty, the intelligent icon is replaced by the standard desktop icon, thereby transforming the Recycle Bin into a conventional icon. However, CornerBin can be set to launch with Windows and completely replace the Recycle Bin icon on the

desktop. The intelligent icon can be configured to display the contents of the Recycle Bin. CornerBin allows users to quickly access the Recycle Bin, the most commonly used option for deleting files. It can also display the contents of the Recycle Bin with a message stating whether it is empty or full. CornerBin can be configured to ask for confirmation before emptying the Recycle Bin, to avoid inadvertently losing data. Furthermore, users can customize the appearance of the intelligent icon for the Recycle Bin. CornerBin is available as a stand-alone application, but also as a Windows desktop notification service.
