much more. iGen Free XP will completely change the way you manage your computer!  
Q: Use Python to write an array of bytes to a file I would like to write a list of bytes in python to a file, using a loop. Here's what I have so far: `import binascii  
log_bytes = [b'0123456789abcdef' for i in range(256)]` with `open('myfile.txt', 'wb')` as `fp`: `for byte_list in log_bytes: fp.write(log_bytes)`  
However, this just writes out an array of hex numbers. I'd like the entire

**Sinhalaya - Convert Sinhala Text to Unicode Text** Sinhalaya is a software utility which enables users to convert Sinhala text to Unicode text. With Sinhalaya you can also convert Unicode text to Sinhala text. The Unicode text can be pasted to the Sinhala text input box in the software or it can be entered manually. Sinhalaya also has the function of converting Sinhala text to Unicode text. Note Sinhalaya does not support some of the Unicode input methods. For example, if you want to use Unicode ZWJ, you need to use `Alt + 00AD` and input ZWJ in the Unicode text input box. Sinhalaya is available for Windows 98/Me/2000/XP/Vista and Mac OS X (10.3 or later). The latest version of Sinhalaya is 1.1.0.2. You can get the latest version from the project page of Sinhalaya: Note Sinhalaya does not allow non-standard or experimental Unicode text. When you are using the Unicode text, some (or even most) Unicode characters will be omitted, depending on the language. For example, in Hebrew characters such as Hei, Hhe, and He will be omitted, and the standard

---

Hebrew character order will be used. The same is true for Arabic, Hebrew, Devanagari, and other languages. Sinhalaya also includes a built-in Unicode converter. When you paste a Unicode text to the Sinhala text input box, the converted result will be displayed in the Sinhala text box. There are the following methods in Sinhalaya: Method 1 Method 2 Method 3 Method 4 Method 5 Method 6 Download Sinhalaya also provides a download service from which you can download the source code and documentation. To use the download service you need to purchase the license key. After the purchase you can download the source code and documentation. Paste Sinhala Text to the Sinhala text box Sinhala text can be pasted to the Sinhala text box. Use the code below for pasting Sinhala text. Option 1 Option 2 Input Unicode Text To paste Unicode text to the Sinhala text box, you need to use the following codes. Method 1 Input Unicode Text to the Unicode text box. Input the Unicode text to the Unicode text box. Method 2 Press the Alt key on the keyboard. Press the Ctrl key on the keyboard. Press the Ctrl + Alt keys
