Easily access your Google Calendar from the desktop to add/edit/view calendar events. Calendar G is a great way to stay organized.

4 comments Sudhir Kishore November 17, 2015 Calendar G is a useful application to make you aware of upcoming events and meetings for Google calendar. I have been using it for quite a while and I have been quite satisfied with its features. I will definitely recommend this application to all the other users.

Peter Davis January 10, 2016 If you are using multiple Google calendars, as I am, this is a very useful application. I have been using it for some time now, and it is fast and easy to use. I love the notification system. I have tested several other calendar software but this is by far the easiest to use. Highly recommended.

Jozia Pakoszuk January 11, 2016 If you don't want to bother with a Google account then you can use the Personal Edition. The Personal Edition of Calendar G is not as user-friendly as the standard edition and does not offer as many features, but you can still do everything you want to do. If you don't want to pay, then you can always install your own software.

Q: Comparing a value to 0 in a string I am trying to check if the number of seconds in a time is in the past, and if it is, I want it to print out the date/time instead of the number. I am using System.currentTimeMillis() to get the time and System.currentTimeMillis() to convert it to the number of seconds. I have a few things that I know are working. I can put all of the values into one string, and the code works for any number that is past 0 seconds from now. However, if the number is a negative, it is off by a whole day. I have tried using.contains("-

#### What's New In Calendar G?

Calendar G is an easy to use calendar application that allows you to: - organize your Google calendar in a graphical way; - view your calendar in a compact or in a list view mode; - add, edit, or remove events quickly and easily; - send an automated or a manual reminder about your calendar entry; - view your calendar by day, month, or by week; - switch between different calendars easily, view events in list or graphical mode; - see upcoming events and get notifications about the most important ones.
