The driver for the g-star iv GPS receiver (type G-STAR) is available for download here. The source code is available at this site. Oct 5, 2013 The ggkb-01 usb gps dongle supports following functions: The usb gps device type is a g-star (g-star iv) The ggkb-01 supports NMEA 2000 version . Oct 14, 2013 Most GPS receivers allow for high-accuracy data logging. While low-cost devices cannot provide position data to the degree of accuracy for most outdoor application, they are adequate for many indoor. . The simplest way to connect a GPS receiver to a PC is to use an USB cable. . The NMEA 2000 radio protocol provides a means for data to be transmitted over satellite links. It also provides a way to pass data between a host PC and a remote device over a serial port. . The signals from a GPS receiver are very faint and few Here is a list of 7 Unix commands for working with the GPS data: . The firmware of g-star iv gps works directly on u-boot. The ggkb-01 dongle (USB serial device) does not provide storage or any other device functions. G-Star IV series Some serial devices can be connected to GPS antennas without a separate cable for power and data connections. . The G-Star IV receiver series is a low-cost, compact GPS receiver that is useful for many indoor applications. . The G-Star IV-9X10 is a high-sensitivity, low-noise GPS receiver. It has a 9.0 x 10.8 square inch receiver plate for receiving radio frequencies from a very low or a handheld transceiver. . The G-Star IV-46 series is a high-sensitivity, low-noise GPS receiver. The G-Star IV-M series is a high-sensitivity, low-noise GPS receiver. It has a USB serial port for downloading data. The G-Star IV-V series is a high-sensitivity, low-noise GPS receiver with a USB serial port. Advantages and disadvantages The advantages of the GPS receiver are as follows: Disadvantages are: Technical Specifications

Squid is an open source Web crawler, and an Internet archive. It is written using Perl CGI. Squid is part of the Apache software distribution. The source code is released under the GNU General Public License. Squid can be used to Web cache. Select an ICX type and size that best meets your application needs. Awards In November 1999, Squid 1.1 was named a winner of "Freeware of the Month" by PC World. It was selected due to its free availability and lack of advertising. Popular culture The Squid project has been featured on a number of prime-time television shows. At the 2006 South by Southwest (SXSW) Interactive conference, Lorne Michaels created a fictional 7-minute web documentary about Squid as part of The Amazing Race. The documentary was subtitled in the style of the series, and in the parody's final sprint (which was titled "The Real Amazing Race"), the teams were given the task of finding a Squid computer for web surfing in a bar. The group led by Simon Carless finished in first place, beating David and Mary Sue in a run-down bar and obtained a piece of paper stating that they were "the real Amazing Race Winners." The sketch was remade in 2008, this time as a 6-minute web movie for the series Punk'd. Squid 2.7 was used in this mock-up, and the original web site and faq files were modified by the production staff to resemble the Squid 1.3 version of the site.
