consent. The option to prefix, postfix, replace and remove strings in the folder names and adjust the font colour and size of the text displayed. Category:Software distribution Category:Windows-only software Category:Windows file searching tools Category:2002 software in any one order and no one could predict how much each one would sell. That information would not be known until after the first round of orders were made. In addition, the fact that the retailers had received the forms from the brokers is of no consequence because neither the brokers nor the retailers could tell which order would prevail. It was purely a guess by both the retailers and the brokers as to which order would be executed first. Such speculation in the securities markets is widespread. See Annot., 9 A.L.R.Fed. 207, 212-216 (1971). Thus, the conclusion of the trial court that the decisions of the brokers to sell securities first was not determinative of priority was not clearly erroneous. In determining that the interests of the Pima and Arizona Wholesalers were not superior to the claims of Mid-State, the trial court found that the Arizona Wholesalers were in possession of the securities at the time Mid-State obtained a superior right to possession. Therefore, Mid-State argues that the status of the Pima and Arizona Wholesalers as holders in possession was not recognized as a valid defense by the Arizona Supreme Court in *Robbins v. Gullledge*, 90 Ariz. 219, 217 *388 P.2d 941 (1950), or by the Restatement (Second) of Conflict of Laws § 209 (1971). Mid-State is therefore asking this court to overrule *Robbins* and to adopt the Restatement approach. This court is not free to overturn Arizona Supreme Court precedent. State v. Superior Court
