When you click the “New Broadcast” button, you will be able to choose a subject, add the email address you would like to send it to, and choose how many recipients the message is going to be sent to. If you choose “Email to One” and choose a contact record, the message will be sent to one contact record. If you choose “Email to Multiple” and choose a contact record, the message will be sent to multiple contacts. Mail Broadcaster is a powerful Windows desktop application that allows you to send email broadcasts to lists, contacts, or contacts groups. Send an email to one recipient or thousands, or even millions. Mail Broadcaster has been designed to be a very strong marketing tool for you and your business. The message text can be added

---

through the Mail Broadcaster window, and it can be saved in the Windows temporary files. With this application, you can create an email message, then choose the recipients, send the message, and even change the display name of the recipients. After you have sent your message, you can save the broadcast using the Windows temporary files, or print a copy of the broadcast. The broadcast will then be sent to all the recipients selected at the time the message was sent. You can also save the broadcasts to email addresses, contacts, or contact groups. Features : If you choose the "Email to One" option, the message will be sent to one contact record. If you choose the "Email to Multiple" option, the message will be sent to multiple contact records. You can choose to send the broadcast to all of your

---

contacts, all of the contacts in your groups, all of the contacts in a specific project, all of the contacts in a specific case, or a group or contact that was just created. You can include attachments to your email broadcasts. You can drag and drop contacts or contact groups into the contact field. You can make the broadcast use Windows' default user account instead of your account. You can change the subject, recipient, body, and display name. You can change the from name, reply to name, and sender of your message. The message will be saved to the Windows temporary files. You can save the broadcasts to email addresses, contacts, or contact groups. You can use the "Send to Contacts" feature to save the broadcasts to groups that you have saved. You can send a broadcast to groups that you have

created. If you 1d6a3396d6

The KeyMacro (or KeyMacro Version 3) was originally developed for use with the DigiKey C168 and C157 Programmable Logic Controllers from Digi International. The original program was created for use with the Macros feature on the C168. This has proven to be a very popular program with many PLC/Macro users. This new version has been redeveloped and updated by Mike.

**KEYMACRO 4 Description:** The KeyMacro 4 was first released in 2011. This is a true PC version of the popular DigiKey KeyMacro. This has many benefits over the PC version of the original DigiKey KeyMacro and was the first version to be fully compatible with Macros for use in Plc's. The KeyMacro has a

---

GUI similar to the DigiKey version and still includes all the features of the original DigiKey version. The KeyMacro is also a true and tested PLC Application with support for MPI 6 and 7 as well as Serial communications. KeyMacro also offers PLC Array and KeyMacro Array configuration of up to 100 Programmable Logic Controllers. A screen shot of the DigiKey Macros Feature is shown below.
