KEYMACRO is a keymap generator. First it shows the keycodes and modifiers. Then it can modify the currently displayed keycodes and modifiers in a manner you select. You can use this tool as a virtual keyboard. It can help to do many keystroke combinations that are impossible to program manually. You can customize this software to your own demands. It is very easy to use. We have just created a free basic version of this software. If you want to have a free version of a pro software then we can help you to create keymap for your own software. We can provide you free, but it may take some time for us. For more information please visit: Full features: You can customize and combine every key you want and every key modifier you want. Multiple (up to 100) key mappings can be assigned to single keys. It can also be used as a software replacement for your keyboard. You can assign any key code to any combination of modifiers. For example, you can use any key code with right Ctrl or Shift keys. You can also set the order of your key mappings. It is also possible to hide keys in your keymap. After creating your keymap, save it and use it in your software. Guideline: Keymacro is not a converter. It is a standalone application that generates keymaps. However, for those who want a key map converter you can use OLE keymap converter. License: This application is completely free. We do not intend to produce any profit from it. It is an important tool for everyone. Developer: Keymacro is created by a developer, it is not a software that a company provides to you. Developer URL: British Airways on Sunday said it was to overhaul its employee pension scheme, and would likely have to shell out millions to shore up its finances. The airline's British Airways Pensions Board, which was created in 2004 to run its six pension schemes, said it would have to make a significant cash injection to its schemes as the collective assets of its pension schemes were worth about £1.5 billion. This piece of software enables you to resize multiple files at once, in any desired format and without manual adjustments. Q: Open image in lightbox after upload from another page I have this upload form that will upload images to the server and then will upload the images to an album. It has 3 tabs. The first tab is album, which is the image I want to see. The 2nd tab is gallery, which is the same images as album, but with a different look. The 3rd tab is a regular upload form, with upload option, check, etc. The 3rd tab is meant to be a sort of "browse" page. I would like to know how I can open the image in the album page after it is uploaded. This is the form for upload: This is the form that has the lightbox: This is the code for the upload: \$errors = array(); \$receipt = \$\_FILES['images']; \$name = \$receipt['name']; \$ext = strtolower(end(explode('.', \$receipt['name']))); \$tmp\_name = \$receipt['tmp\_name']; \$size = \$receipt['size'];
