

Jun 28, 2013 - This Pin was discovered by Hampton Models. Open (and save!) your own pins on Pinterest. For convenience. In this case, to save your file in PNG format, all you have to do is click the "Save Copy" button. When you save an image to a flash drive, all files are saved in PNG format. Today, this is probably the most popular form of saving a PNG file. How do I take a screenshot on Windows 8? After you press the Print Screen button (in most cases it is the "P" button on your keyboard), a screenshot of the whole monitor will appear on your screen. Now we will learn how to take a snapshot of the active window. To do this, click on the "Start" button on the left side of the window, then select "Control Panel" - "Appearance and Personalization". In the "Personalization" window that opens, select the "Colors" tab. At the very bottom of this tab you will see a "Screen mode" button, click on it. In the window that appears, select the desired color - "Gray"; Then press the "OK" button and the image will appear on the screen of your computer.

---

How to take a screenshot of the whole screen on Windows 8? In this operating system, it is also possible to take a screenshot of the entire desktop. But for it, you need to enter any section of Windows through the "Start" button. In "Start" on the left side of the screen, click on "Applications" and then select "All Applications". You need to find the "Scissors" program. In the window that appears, click "Create". After that a window to create a screenshot will appear on the screen. Here you need to choose a place on your desktop where your future screenshot will be placed. If you do not know where the folder you need is located on your computer, then select "Search" and enter in the search box the name of the folder in which the file is located. Once the file is found, click on it with your mouse and select "Open". Now you can take your screenshots at any time.

2. How to take a screenshot in Windows 7 This version of the Windows operating system also has the ability to take screenshots. To do this, you just need to press the Print Screen button on your keyboard. Once pressed, an image of your computer screen should appear, and in a format that can be emailed and added to your gallery. Also in this version it is possible

---

to create a video and photo of the screen. To make a screenshot, you have to press the Print Screen button on your keyboard. After that, an image should appear in the "Screenshot" section. You can send the screenshot immediately by e-mail or add it to the gallery. In case your application does not have this option, you can leave a screenshot in a special section of the application. To do this, tap "Photos" and select the "My Pictures" section. In this section, you can select a picture to be stored on your device. This application has the ability not only to take screenshots of the screen, but also to edit them. In order to take a screenshot using this application, click on the "Screenshot" button at the top of the screen.
