the success that it has brought me. I hope you've enjoyed them as much as I've enjoyed writing them, and as always, I'm very grateful to you for reading them. I wish you all the best! File this under misread: Carole King, the best female vocalist of all time and a serious contender for best music lyricist, is rumored to be dating Kenny G. The news comes from the New York Post, which quoted unidentified sources saying

---

that the crooner had asked his singer-songwriter-girlfriend to move in with him. King is said to be keeping the news quiet so as not to crush their relationship, although the sheer audacity of her alleged move is pretty mind-blowing. A former band member has already come out with the "so-and-so is gay" equivalent: That singer, Kevin Powell, is gay. But I'm really curious about the symbolism of this move. It's like the

---

only thing King does is play the piano, but I've seen her perform with the Gay Men's Chorus, singing about loving your mother and rocking the gay nightlife. But now, she has a new relationship? It seems like it's time for another, uh, change? I guess I'm at the point where I'm just waiting for a breakup announcement, and that's what makes this news so jarring. Airconditioner Repair In
