Q: Method not defined error from inherited class in Swift I am trying to refactor a bunch of code and end up with the following class: import UIKit @objc (AbstractDB) open class AbstractDB: NSObject { open override func awakeFromNib() { super.awakeFromNib() // Initialization code } open func save() { // Do something } } When I try to call this method it gives an error: 'AbstractDB' does not have a member named 'save' How can I make this method accessible to other subclasses? A: You should make it a static function if you want other classes to be able to call it. Otherwise it would be an instance method. Static functions can be called like AbstractDB.save() while instance methods are called like AbstractDB().save() Herald Stands With Friend of the Rebel Col.
