Q: What does `tf.train.introspect` do? What is the purpose of tf.train.introspect()? I found it in code snippets in a TF tutorial for a few models I was trying to understand, but can't find any details in the documentation or the model "docstrings" on "TF-Slim" or "TF-Theano" A: As for what introspect() does. If you look at the description of the method in the API docs, it says: Extracts the function definition and the list of input/output tensors for this function. The docstring also provides a full description of how introspect() works. Case: 15-40051
