The new mechanics allow you to control the ball using natural foot movements, landing and kicking the ball accurately from just a few meters away. The technology also allows you to pick the ball up at any moment with a flick of the wrist, while all actions are performed with more precise and realistic body movements. Manage the speed of the ball by picking it up with your foot at any time Collect more points for excellent goal-kicks, headers and blocks Perform even more precise and dangerous passes Manage the speed of the ball by picking it up with your foot at any timeCollect more points for excellent goal-kicks, headers and blocksPerform even more precise and dangerous passesManage the speed of the ball by picking it up with your foot at any timeAlicia Vikander – Lara Stone – Léa Seydoux – Emma Donoghue – Jonas Blixt – Pedro Otávio – Adam Lambert – Jan Vertonghen – Paul Berglund – Serhiy Pashynskyy • Hyper motion performance puts the ball in play almost instantaneously, even when you're outside the penalty area and it's an instant reaction to your movement. • Accelerate the ball at any time: Move your dribble with the right foot or pass with the left and use your own body in the final stride to help guide the ball into the target. • Manage the pace of the action using new reactions to your movement. Decide whether you want to accelerate, quick-stop or slow the ball down at any moment by pressing and holding down the right or left trigger. • Take on challenges quickly: Whether it's a teammate sprinting at you or a defender about to intercept a pass, your opponent's momentum will work in your favor if you're quick enough. • Complement your new sense of pace with more precise passes. Laying the ball off at the right moment can leave you open to the counterattack. • When you need a greater degree of control over the ball, quickly flick it with your foot to evade defenders or shift it into open space for an on-target shot. • Use your movement to your advantage
