World Class Player HD: User Interface For the first time in the series, every single real player has

been given a face-lift to make them look as life-like as possible. FIFA's diverse cast of players includes international superstars, legends and real-world personalities from across the game's history. With enhanced animations, realistic faces and new clothing, each player looks like an unstoppable force on the pitch. Enhanced Attacking AI The most reliable, smartest and most intelligent attacking AI in the business, with new defensive and counter-attacking strategies that have never been seen before. New Shot Control and Finishing Techniques FIFA 2016 brings a number of attacking control options to help players kick, chip and pass the ball accurately while on the move. Players can now use the new dribble move and freely switch it on and off using the left stick at any time during the attack. Better Player Control and Movement New controls make it easier to use both the new dribble move and move with the ball without using your left thumbstick, and the control improvements also make it easier to use individual players when giving instructions. The ball now rolls towards the nearest player when you move with the ball, and players' control is tighter when you're giving instructions. New approach and strategy AI One of the biggest and most controversial changes for FIFA 2016 is that the AI now reacts to the way you play the game. Whether you are playing a defensive or attacking approach, the AI will respond to your way of playing the game.
