EF StartUp Manager is a tool that allows users to create startup files to run with Windows, to make it easier to start certain programs or to disable certain programs from starting up. EF StartUp Manager - Simple and fast interface EF StartUp Manager is a program that's got a pretty simple user interface. It doesn't come with any form of themes or skins. You'll be able to use it with plain Windows as it comes. All the important options are located in the context menu. EF StartUp Manager - Add and modify registry entries When you launch the program, you'll be able to add and modify registry entries. This means that you will be able to disable certain programs from starting up, as well as add various utilities to the list of startup items. EF StartUp Manager - Duplicate registry keys It's pretty easy to duplicate registry keys in this application. You will need to enter a name for the new key. After that, you will be able to choose which file or folder to use as a data source. To avoid any problems, we recommend that you check the options. EF StartUp Manager - Show Windows error codes You will be able to view all the error codes that appear in Windows. These codes are the ones that appear when you try to open a file and the file can't be opened. EF StartUp Manager - Export registry keys and items You will be able to export all the entries to a TXT, CSV or HTML file, which you can later import to EF StartUp Manager. This will allow you to create, modify and remove entries at any time, as well as remove or start programs. EF StartUp Manager - Import registry keys and items You will be able to import registry entries, which you can modify or remove at any time. To avoid problems, we recommend that you check the options. EF StartUp Manager - Delete Windows registry keys You will be able to delete registry keys manually. This can be used to update this registry key to a newer version that is already installed on the system. EF StartUp Manager - Generate startup data You will be able to generate a list with all the programs that are going to start up, as well as the startup scripts. It is easy to add programs and to remove them. EF StartUp Manager - Export directories to HTML You will be able to export the entire system directory tree, which can be later imported back into this program. Portable EF StartUp Manager
