SendEmails.com Free Edition Incl Product Key

SendEmails.com Free Edition is a reliable and comprehensive newsletter-sending software, featuring advanced functions and numerous options. The product features fast delivery which submits your newsletter in minutes, highest delivery rates, a new personalization engine "DynamicText" with scripting support and detailed real-time statistics. You can track the success of your campaigns with detailed statistics on opened e-mails, forwarded e-mails and visited webpages on your entire website.

In addition, you can determine the exact geographical location of your customers with a high resolution (+- 25 miles) and send geotargeted offers to countries, regions or even cities. The application allows you to use DynamicText to merge database fields and to create messages with individual content and appearance. Send targeted offers to age-groups. Determine the gender from first name and send custom offers to male and female users. Send e-mails to users, who have or have not visited your website for a defined time span. You can use more than 100 functions to generate more rules. SendEmails.com Free Edition bypasses restrictions for outgoing e-mail set by your ISP. SendEmails.com Free Edition offers CAN-SPAM compliance and automatically handles subscribe or unsubscribe requests of your users. SendEmails.com Free Edition connects to a variety of databases: Microsoft Excel, Microsoft Access, Microsoft Outlook, CSV, dBase, Microsoft SQL Server, MySQL Server, IBM Informix, Oracle, HTML Files and unformatted text are supported. The add-on module for the MS SQL Server is integrated in the MS SQL Server database. The application automatically stores the generated database queries in a separate query log, so the queries that are executed the most often are used as a basis for generating intelligent mailings. This way, you save the time spent on the development and realization of the mailings. The add-on module automatically inserts the transactional data in the database queries and adds the generated mailings to the orders in one transaction. Advanced Mailing (Homepage) SendEmails.com SendEmails.com is a reliable and comprehensive software product for generating customer-related e-mail and MS Word-based mailings that are personalized according to customer profiles. SendEmails.com has been designed to enable you to perform cross-channel marketing (e-mail, direct mail, SMS and Websites) and one-to-many messaging. You can use various data sources (such as customer b7e8fdf5c8
