Whether you use your smartphone as a dedicated gaming device, a primary communications tool or both, one thing is for certain: we all need to stay on top of our game. Keeping up with the all-time greats is a tall order; then there's the constant barrage of new game releases, along with the continuous refinement of current titles. iOS gaming can be just as demanding. With the constant reload of countless app updates, it's easy to lose site of what makes your favorite titles unique. Now, if you don't have time to pay attention, that's when you need these 10 tips to help you get the most out of your mobile experience.

1. Download the correct version The iOS App Store is rarely an easy place to buy apps and that's if you're aware of what you're looking for in the first place. With dozens of different app categories to browse, it's easy to download apps you don't need or have no interest in. In the top-right corner of an app's store page, it's usually marked with a version number. If it says "1.0", it's an early release, or beta version of the app. Reading through the release notes is the first step in knowing what version you should be using.
2. Understand what the app does It's usually pretty simple to figure out what an app does, but not always. Go straight to the app description to find out what the app can do, how it works and what platforms it will run on. This way you don't waste time downloading something you aren't going to use or bother about a game that's not compatible with your iPhone.
3. Look for the right permissions When you download an app, it often requires permissions to access certain things. While many apps will pop up a dialogue box when you launch the app to make sure you agree to their permissions, it's still important to read what the app actually needs to do. For example, "photo library" means the app will allow you to browse your camera roll and use your photos. If that's not something you want an app to do, don't install it.
4. Prevent clutter Spent all your hard-earned money getting the latest
