This feature, implemented in FIFA for the first time, creates an immensely lifelike and immersive experience. From the strength of your real-life tackle to your footwork when planting a header, everything is multiplied and improved. FIFA 22 for PlayStation®4 gives players the ability to accelerate the most realistic world-class football games to the next level with the EA SPORTS Seasonality™ Engine and gameplay variables. The EA SPORTS Seasonality Engine has added real-world player movement data collected from 22 live players in motion capture suits during a FIFA game. This enhances gameplay in various ways, including speed of movement, acceleration, agility, heading, tackling, goal scoring and a more realistic ball trajectory. Additionally, FIFA 22 introduced the Dynamic Cross System. The Dynamic Cross System emulates the instinctive and unpredictable movements of the player when receiving the ball across the turf. The core value of

this system is to provide player control through unpredictable and dynamic movements. FIFA 22, in conjunction with the Dynamic Cross System, introduces “Speed Jumps” and “Tackles,” which amplify the dynamic and unpredictable movements of players. Speed Jumps are the most intense form of attacking when defending. Defending players can make any attack unpredictable by launching the ball high into the air with a jump. Once the ball is in the air, attacking players will sprint towards it to attempt a goal. When attacking from a speed jump, players can make a tackle off-balance by attacking the ball with an unexpected lunge. Tackles are a natural reaction to defensive pressure and also can be unpredictable and forceful. Players can make a tackle off-balance by attacking the ball with an unexpected lunge, or by tackling the player who was in possession of the ball. - Discover all the new features and improvements coming to FIFA 22. - See how the Dynamic Cross System enhances gameplay. - See how the speed of player movements is amplified. Use the PlayStation®4 to make all of your favorite players look their best on the big screen and let the world see how they really play. I find it hilarious (and a bit sad) how EA so easily forgot all the bad things that happened in FUT 15. I was so happy with the update that I was gonna trade every one of my FUT 15 players, except for the Brazilian standouts.
