In addition to the real-life player data, EA SPORTS Football Club's enhanced player intelligence allows players to become aware of their own physical abilities and tendencies in high pressure scenarios. HyperMotion technology also includes new tools to allow players to analyze their performance and improve their game as well as new camera angle options in FIFA Ultimate Team. "We've also improved AI and gameplay intelligence to make the competition, tactics and strategies you create more believable and exciting," said Matt Bilbey, Lead gameplay designer for FIFA Ultimate Team. "And now you can simply and intuitively adjust your player movements and tactics to adapt to match conditions, whether you're headed to a stadium, a training pitch, or wherever."

ENHANCED INTELLIGENCE AND AI Using data from historic match reports from real-life games, players are able to understand the tactical and technical aspects of the game. In FIFA 22, there are eight methods available to test your tactics and strategies: Cross-Team communication: Analyze your chosen tactics and strategies by communicating with your teammates on the pitch during an actual game and see how they react to your tactics. Learn from experience: Test your tactics and strategies on the virtual pitch and see how they perform against real opposition. Use the editor: Gather data from your game play matches and use it to test your tactics and strategies in your game. Create tactics: Use the intuitive editor to craft your own tactics from scratch. Compare tactics: Compare tactics from real-life matches with your own tactics. Watch it happen: Simulate your tactics and strategies on a pitch and watch how it plays out. Analyse your tactics: Analyze your game play tactics and see how your opponents reacted and adjust your tactics accordingly. Test your tactics: Test your tactics against the system and see if it will perform optimally against real opposition. In addition, all players now have a presence in the strategic management mode as well as new coaching feedback in FIFA Ultimate Team. Players can now create and test their own tactics and strategies on the move during a match, including co-op and counter-coaching.

COACHING FEEDBACK AND MANAGEMENT In FIFA 22, coaching feedback has been enhanced to help players develop their tactical awareness. Players can analyse the strategies of opponents and analyse their

Features Key:

- All-new ways to play In FIFA 22, redefine your ideas of gameplay – with a new dribbling system, more dribbles, more headers, more on-the-ball actions, key passes, and more – then master a refreshed player dribbling mechanic to create a more rhythmical, precise, and intense experience.
FIFA 22 introduces new ways to play:
